

Sparkov: fresh ARGN baseline vs explicit past-state features

● Fit seed 20260930 ● Fit seed 20261001 ◆ Descriptive mean --- Real development value

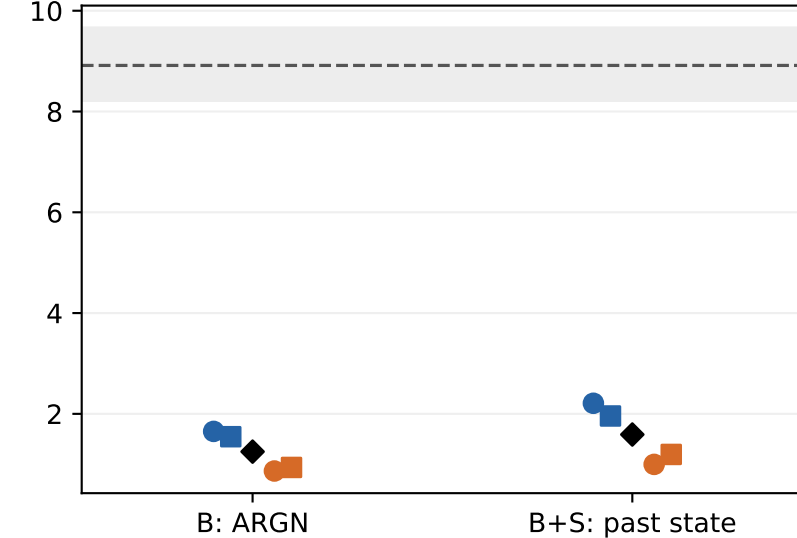

Fraud prevalence (%)

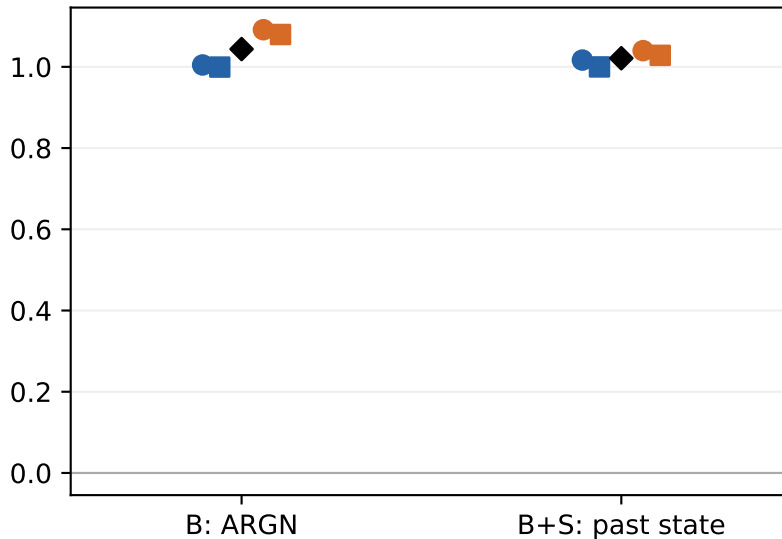

Observed fraud-run mean length

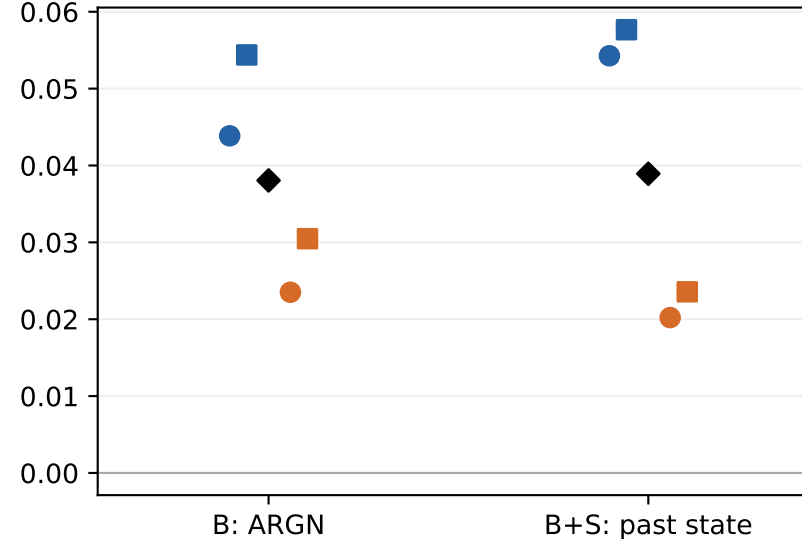

Observed-next termination (%)

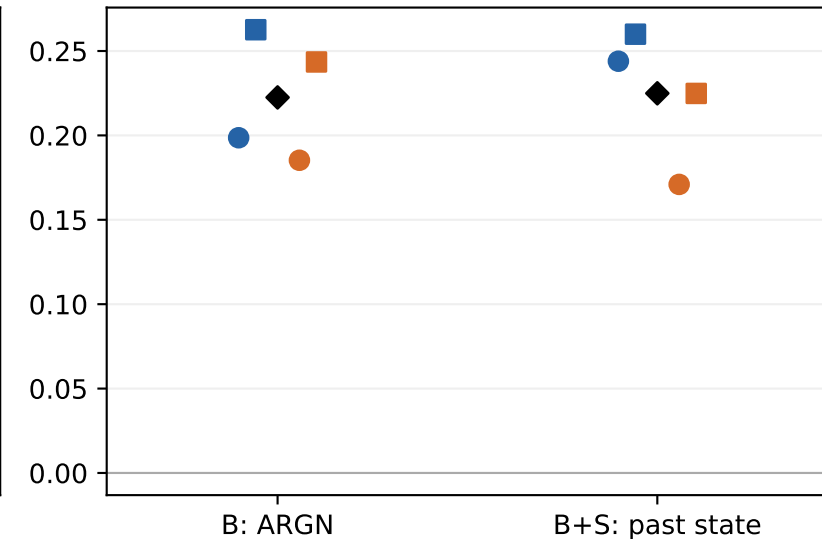

Fraud amount / past median: log-W1

Normal amount: log-W1

Customer length: log-W1

Each arm: 2 independent fits x 2 free-generation draws. Shading: real customer-bootstrap 95% intervals. Distances: lower is closer. Four dots are not four independent fitted models. No real future lengths are supplied.
